

# Project Design Phase

Date	01 November 2025
Team ID	NM2025TMID05296
Project Name	Laptop Request Catalog Item
Maximum Marks	2 Marks

## Problem–Solution Fit

### Problem:

Employees experience delays and confusion when requesting laptops because the process is still manual and paper-based. There is no interactive form to guide users or validate input, making data entry error-prone and tracking requests challenging. The lack of automated workflows results in inefficiency and poor communication between employees and the IT department.
